Full-Stack Developer | AI/ML Engineer (Entry-Level / Internship)

SUMMARY

B.Tech Computer Science (AI/ML) student at IILM University (CGPA 9.2/10, graduating May 2027) with hands-on experience building full-stack applications on the MERN stack with Supabase, and training machine learning models with Scikit-learn during a Google AI-ML virtual internship. Delivers measurable improvements in application performance and model accuracy through applied data structures, API design, and feature engineering.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, SQL

Full-Stack Development: React.js, Node.js, Express.js, REST API Design, Flask

Machine Learning: Scikit-learn, NumPy, Pandas, Feature Engineering, Model Evaluation

Databases / Cloud / Tools: MongoDB, Supabase, Git, GitHub, VS Code, Google Colab

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

AI-ML Virtual Intern | Eduskills — Google AI-ML Domain | Jan 2026 - Mar 2026

- Trained and evaluated machine learning classification models in Python using Scikit-learn, achieving 85% accuracy on the assigned dataset.
- Applied data preprocessing and feature engineering to the training pipeline, improving model performance by 20%.

PROJECTS

FormSathi — Application Management System | React.js, Node.js, Supabase | Apr 2026

- Built a full-stack application management platform using React.js, Node.js, and Supabase, supporting 150+ users.
- Optimized database queries, reducing average response time by 25%.

Digital Mental Health Platform (DMH) | Flask, JavaScript | Feb 2026

- Developed a full-stack platform using Flask and JavaScript, designing RESTful APIs for authentication and data management that handle 500+ requests per day.
- Improved backend efficiency by 30% through API and data-layer optimization.
- Integrated AI chat and mood-tracking features, increasing user engagement by 20%.

StreamSense — Recommendation Engine | Python, Cosine Similarity | Mar 2025 - Apr 2025

- Built a recommendation engine in Python using cosine similarity across a dataset of 5,000+ data points.
- Reduced API latency by 40% through algorithmic and query optimization.

COMPETITIONS & HACKATHONS

Hack 24 Hackathon | IIIT Delhi | Aug 24, 2024

Cybersecurity Hackathon | IIT Kanpur | Feb 15-18, 2025

Drone4S Hackathon | IIT Roorkee | Oct 12, 2024

Represented IILM University at three national-level hackathon events.

EDUCATION

Bachelor of Technology, Computer Science (AI-ML) | IILM University, Greater Noida, India | Aug 2023 - May 2027

Cumulative GPA: 9.01 / 10.0

Intermediate (Class XII) | New Public Inter College, Lucknow — 78% | 2022

High School (Class X) | New Public Inter College, Lucknow — 90% | 2020

CERTIFICATIONS & ACHIEVEMENTS

Machine Learning | Columbia University | Aug 2025

Intro to Deep Learning | Infosys Springboard | May 2025

Database Design | Infosys Springboard | Nov 2024

Programming in C | Infosys Springboard | Oct 2024

Winner, College Coding Quiz | 100+ participants | Aug 2023

Finalist, IIT Roorkee GreenGuard Hackathon | Top 5% |

6th Rank — IIIT Delhi Hackathon
